FROST
&
SULLIVAN

Frost & Sullivan's Best Practices Awards recognised XLink for its Technology Leadership in South Africa.

vodacom

XLink is wholly owned by Vodacom, and forms part of their IoT group of companies.

COMPANY OVERVIEW

ABOUT US

XLink was established in 2004 to become a leading provider in providing agility, resilience and best practice in connectivity for the retail and payment sectors. When XLink first opened its doors, the connected world was just starting. By leveraging the skills we honed in the payment and retail sectors, we have become the perfect partner to help consult, develop and orchestrate products and solutions in the connectivity space.

OUR CORE CAPABILITIES

Business Analytics

Taking advantage of the evolution of IoT to enhance the in-store customer experience through the deployment of new analytics platforms.

Valuable consulting

Comprehensive consultation service to understand and identify the connectivity requirements and risks in your business.

Support services

Comprehensive support services available nationally to all our customers, 7 days a week every day from 7am to 10pm.

Technical Strengths

Technical skills, capabilities and infrastructure providing a complete range of information and communications technology services and solutions.

Outsourced Capabilities

Providing trusted and proven Managed Outsourced Services to simplify, enhance and manage your business environment.

Secure solutions

Our QIR certified installation experts and international QSA consultants ensure you meet the PCI compliance requirements your business needs.

POS PAYMENT

XLink is the market leader in providing tailored, innovative, cost-effective, secure and managed payment communication solutions.

SOLUTIONS

WI-FI ENABLED POS CONNECTIVITY

W-Fi access point allowing for secure, cost-effective wireless connectivity for Wi-Fi enabled POS devices

GSM ENABLED POS CONNECTIVITY

Budget modem for payment transaction connectivity

MOBILE POS

SIM and data management across a private APN for telemetry products accessing XLink's back-end portal

ATM CONNECTIVITY

Communication solution that links ATMs to their host systems

CASH MANAGEMENT

Communication solution for the automation of in-store cash management processing

SERVICES

TRANSACTIONAL MONITORING

An application for the remote monitoring of transactional processing and performance of XLink devices

END DESTINATION MONITORING

Application for the remote monitoring of end destination IP & URL addresses

SIM MONITORING

Application for the location of SIMs, providing geographical display of the location of wireless devices

MAINTENANCE COVER

On-site support cover for XLink Communicators at a fixed monthly cost

REPLACEMENT COVER

Replacement plan for protection against theft or damage of the XLink Communicator or SIM card

INTEGRATED PAYMENTS

Mobile and fixed line communication devices, infrastructure and services for secure data processing, failover, asset and infrastructure monitoring

SOLUTIONS

ETHERNET MODEMS & ROUTERS FOR INTEGRATED PAYMENT CONNECTIVITY

VersaLink

Versatile router for integrated payment system connectivity, inter-branch connectivity, ATM connectivity, VPN creation and failover for fixed line infrastructure

LANLink

Ethernet-enabled modem for integrated payment system connectivity

SECURE FIXED LINE INTEGRATED FAILOVER SOLUTION

VPN Secure

Managed fixed line connectivity integrated into the XLink portal for high volume EFT processing with seamless failover to GSM via the VersaLink modem

SERVICES

SMARTLINK

Application for the remote monitoring, reporting and profiling of the VersaLink performance

SECURE CONNECTIVITY

- Engagement with the retail and technology sector to provide a complete range of information and communications technology services and solutions for payments in retail.
