Fixed Line LTE
Enjoy reliable and uninterrupted internet connectivity

Fixed Line LTE offers a faster and more efficient data network for small- and medium-sized businesses, and with speeds up to three times faster than 3G, it provides reduced network delay for business activities such as video conferencing. At an average speed of 20 Mbps, Fixed Line LTE lets you connect multiple devices for instant downloads, easy file sharing and seamless collaboration across the office.

The service is wireless. There is no waiting for line installations. Your business can literally cut the cord from the frustration of having to wait. Just switch it on and be ready to connect. It is one of the fastest ways to get your office the connectivity it needs.

Features

- National average speed of 20Mbps
- Capped service plan options from 5GB to 200GB
- Suitable for temporary solutions, conferences, construction sites as a backup to Fibre
- Targeted at SME market for quick plug and play business set-up
- Includes Wi-Fi router

Benefits

- Fast, reliable, and portable internet access
- Quick plug and play, self-installed connectivity
- No fixed-line installation required
- No copper cables and digging up at premises
- Nomadic between multiple offices or a temporary office e.g. Construction *Provided Vodacom coverage is available
